### **DETAILED ACTION**

This Office action is responsive to the Notice of Withdrawal dated April 06, 2006, reopening prosecution.

#### ***Election/Restrictions***

Claim 14 remains withdrawn from further consideration. See the Election/Restrictions section of the Final Office action dated 08/01/05.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 12, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Torre et al (2002/0055757).

Torre et al teaches:

A prosthesis for implant 70 in a human patient body comprising:

at least one elastomeric envelope 140,

a filling material contained in the elastomeric envelope; see at least paragraphs 0091 and 0092; and

a biologically compatible chemical rupture indicator contained within the elastomeric envelope capable of leaking out of the envelope and causing a body change detectable to the patient, wherein the body change detectable to the patient is

a change in a body secretion selected from the group consisting of urine, saliva, perspiration, feces, and combinations of these; see at least paragraph 0092 stating, *"the filling material may also include barium sulfate (BaSO<sub>4</sub>) or a similar agent so it can be seen on x-ray; or blue dye, such as methylene blue, such that the patient would notice a change in urine color that would signify a leak or other break in the device barrier."*
